Ind 25/11/(3) Sec 34(2) b of the Regn only says that Govt may make rules for conserving & guarding against pollution all sources of water supply to the Mining areas. It does not necessarily follow that all such sources should be included within the jurisdiction of the Sanitary Board. As this cannot be done under the Regn except by the decision of Govt already communicated to the Board, the Dy Comm^r may perhaps be asked to state ~~whether~~ if any & if so, what steps are necessary in order to effectually safeguard the water supply apart from the question of including the village in the Sanitary Bd area: A reply may be sent to the Dy Comm^r after receipt of the Dy Comm^r's report in the matter

ble to the case of all the villages surrounding
the Tank and for that matter further
still as well. The agreement will
have some force if the fields
lands were situated in Batticaloa
but this is reported to not the case.

2. If the jurisdiction of the Sanitary Board
already extends up to the limit of
Batticaloa there might be some reason
for including that village also within
the area but there is no definite in-
formation available and I am not
able to make out clearly from the
list of villages and the Tank map
the actual limits of the area. If
approved information on this point
and the location of the fields will
be obtained from the Dy Commr.

There is one Batticaloa village included in the list and a village of that name is situated north of Batticaloa
